Panasonic Introduces Modularity

Never settle for anything less or more than your needs require. The Panasonic KX-E700m is the first modular typewriter which allows you to choose the features you need for your typing requirements. For limited typing, you can start with the base unit and as your needs grow, so can the KX-E700m.

Your Choice of Displays

The KX-E700m provides you with the option of different displays. Choose a 20-character LCD, 40-character LCD or a 40-character vacuum fluorescent display or select the full-size CRT DisplayMate option; you decide which would best meet your needs. All of these displays are designed to provide the operator with easy viewing for correcting and editing.

Expandable Memory

The modular KX-E700m allows a typist to upgrade the memory to 32,000 characters of storage and as your needs grow, so can your typewriter which can be expanded to 64,000 characters. If your application requirements demand even more storage capabilities, there is an optional 3½″ disk drive internal to the unit that can provide you with up to 360K of storage instantly.

Powerful Text Editing Capabilities

The many advanced text editing features available with the memory upgrade are designed to provide the typist with flexibility and versatility for all typing applications. From block move/copy/delete to global search and replace, to text linking; these features eliminate time-consuming retyping. Document formatting features for underscoring, centering, and bold print are made simple through the touch of a key.

Specialized Applications

Additional features for quick and easy document preparation are available, such as column layout, mail merge, forms layout, vertical tabs, and line framing. These important time-saving functions, combined with the basic editing capabilities, provide the typist with the quality documents demanded in today's office environment.

Panasonic
MICRO FLOPPY DISK

The KX-E700m offers an additional 360K of storage with the optional 3½″ double-density disks.

Panasonic Modular Typewriter 700m

The KX-E700m can be upgraded with the choice of displays for easy viewing of text as you type, create or edit documents.
